# THE FUTURE OF ENERGY AND MOBILITY CAME TOGETHER AT PETROLEUM ISTANBUL

The 17th International Petroleum Istanbul Exhibition, the largest and most significant meeting point for the petroleum and fuel sector in Türkiye and the region, was successfully held at the TÜYAP Istanbul Fair and Congress Center from April 24 to 26, 2025.

Bringing together leading companies in the sector, public representatives, and thousands of professionals, the exhibition hosted collaborations, new technologies and knowledge sharing over the course of three days.

With over 25,000 visitors and more than 150 participating companies, the event served as a significant trade and promotion platform for many local and international brands. The latest products, technologies and solutions in fields such as energy, fuel, LPG, non-fuel retail products, car wash systems, electric vehicles and charging ecosystems, next-generation fuels and mobility were showcased to visitors.

As part of the fair, a rich program of sessions focused on key issues shaping the industry. Panels addressed a wide range of topics including sustainability and workforce transformation in the petroleum sector, e-mobility, non-fuel retail, biofuels and next-generation fuels, advancements in fuel equipment technologies and digitalization. The Grand Dealer Meeting, which has long been a traditional part of the fair, also attracted great interest, with participation from both public and private sector representatives. These agenda-setting sessions not only contributed to shaping the industry's vision but also provided participants with valuable opportunities for exchange of ideas.

Petroleum Istanbul brought together industry representatives not only from Türkiye but also from Europe, Asia and Africa. Visitors and participants from numerous countries—including Germany, the United Kingdom, China, Russia, Iran, Austria, and the United States—along with collaborations with various international NGOs from Europe, Africa, and the Middle East, further strengthened the fair's international profile. Standing out as a key meeting point shaping the future of the industry, Petroleum Istanbul once again proved to be one of the most effective trade platforms where brands connect with their target audiences—offering a strong content program, high participation, new collaborations and an inspiring atmosphere.

 $\frac{9}{9}$  plan to exhibit in the next edition.

## **VISITORS:**

**%94** want to attend the next edition.

%85 said they would recommend the fair to their colleagues.

%92 stated that the fair is very important for the industry.

# **TESTIMONIALS**

# GENERAL MANAGER, ALPET

"The fair was very dynamic. Participation was, as always, very high. It was a great exhibition where everyone showed strong interest, all stakeholders were present, ideas were exchanged, and industry challenges were discussed. Seeing the participation, the enthusiasm of the people here, made us very happy. Our booth also attracted a lot of attention. As Alpet, we are especially pleased."

# TOLGA PARMAKSIZ SALES DIRECTOR, AYTEMİZ

"This is a great place to come together with our business partners. We not only share our innovative services with them but also explain what changes we have made and what we plan to do in the future. That's why we value this fair highly. Every year, we strive to be as involved as possible. It gets busy and it's also very enjoyable."

# ( HÜSEYİN LATİFOĞLU

# GENERAL MANAGER, ISTANBUL JET AVIATION AND FUEL SERVICES

"As the Istanbul Jet Group, we participate every two years. We are extremely happy to be part of the fair. We see this fair as a key meeting point for the energy sector in Türkiye. It's a very good event where we present the activities of our companies and occasionally engage directly with end users. We are pleased to be here."

## **((CHRISTIAN WARNING**

# FOUNDER AND MANAGING PARTNER, THE RETAIL MARKETEERS

"Petroleum Istanbul is a very impressive fair. It is large and captivating. At the same time, there's also a good mix present. I was quite impressed by the large booths of oil companies and their innovative developments. This is a perfect fair for networking. There is a very good combination for the mobility sector with booths and solution providers from many different areas. In my opinion, World Of Mobility is a term that better captures the change and transformation of our sector than Petroleum Istanbul. The name "Petroleum" only covered fossil fuels. However, World Of Mobility also includes alternative energy sources, retail and car wash services. I am very excited to return in 2027 and witness the progress of this transformation."

## **(( SELÇUK BOROVALI**

# CHAIRMAN OF THE BOARD, BIOFUELS INDUSTRY ASSOCIATION

"We are pleased to be at Petroleum Istanbul. This is our 4th or 5th time participating. Since Petroleum represents all fuels used especially in transportation — the sector, from production to sales, from sales to distribution, including terminals and equipment — we, as biofuel producers, are very pleased to be part of this fair."

# IMRAN OKUMUŞ

"This is a fair I've been attending for 17 years. As always, it's been a very enjoyable experience. In the Grand Dealers Meeting session, we will talk about the past and future of the sector. We will address the expectations of dealers. We will present the work our union, PÜİS, has done and the work we plan to do."

# **TESTIMONIALS**

# MURAT BILGIN CHAIRMAN, TABGIS

"The fair is held every two years, but it's important for us because it allows us to follow new developments together with all our stakeholders. We've also learned that the fair's format will change in 2027. We're curious to see what it will be like. I cannot help but mention the positive contributions of such fairs to us. There are definitely positive outcomes as well."

# GENERAL MANAGER, TEKTEM MAKINA

"We have been participants since the early days when the Petroleum Istanbul Fair was first organized. Therefore, fairs are important venues where new products are introduced. Although the internet has advanced, people can still see the devices up close and, if necessary, gain knowledge about their use. This is a fair that promotes such introductions in the industry. Therefore, we make an effort to be here regularly. Especially at this fair, explaining and showcasing our new products is an opportunity for us."

# MÜCAHİT ÇELİK GENERAL MANAGER, ŞAHİN TANKER

"We had participated the Petroleum Istanbul Fair several times before as visitors. This year, we wanted to participate as an exhibitor. The reason is that we decided to join based on requests from our customers. We are very pleased. The fair is going very well. We've achieved a performance far beyond our expectations."

# AYTUĞ BİRNALKESER CO-FOUNDER AND CEO, WİTTYCAR

"First of all, we'd like to thank everyone who contributed. We believe this is a great place to present and express ourselves. There was especially a lot of interest from both participants and visitors. We believe it's a very important fair for the fuel sector. I can say that, in terms of quality, it is a top-level fair. We will definitely participate in the WOM 2027 Fair. As Wittycar, we believe we've taken on a responsibility in leading the sector's shift toward digital transformation. With the ongoing transformation of the sector, we will certainly continue to take our place here."

# KIMUMWE ZACKAYO STEVEN REPRESENTATIVE OF PEDEA UGANDA

"This is my first time attending this fair. I truly enjoyed it. It's very impressive to see the developments and innovations from all around the world — from Türkiye, China, and other countries — and the solutions that companies are offering. One of the most striking things I've seen is EV charging devices and electric vehicles because this shows that we are all moving in one direction — toward green energy. We can see that we are all progressing in the same direction to make our environment better. I hope that even next year, green energy and electric vehicles will become an even bigger focus. This transformation will elevate the WOM 2027 fair to a much more prominent position globally."

# SHANDONG HIPECH INTERNATIONAL TRADE

"The Petroleum Istanbul Fair is very professional. We want to create new customers and partnerships to introduce our products to this market. Even though today is the first day, a large number of customers have already come to the fair. We are very happy to be participating in this event."
